

## Water & Powder Blender

### Complete Line

pasteurized milk production line

UHT milk production line

yogurt production line

cheese production line

butter production line

skid mounted pilot plant

condensed milk production line

ice cream production line

### Machinery

Stainless Steel Tanks

Sterilizers

CIP system

melting and dissolving machine

**chocolate melting tank**

**water & powder blender**

evaporator & degassor

cheese & butter machine

heating and cooling machine

crate washing machine

## water & powder blender

Description of water and powder blender:

mainly used to hydration for milk powder(mix the powder with water); mix the coco powder to the milk; make whey solution; mix the wheat powder with water; produce salt water; pre-blend the yogurt or other dairy products etc.

Production capacity: 5T/H-20T/H

Model	Flow rate (T/h)	Material dissolving capacity	Technical data	External size(cm) (L×W×H)	Power (KW)
SFHE-10	10	800 (Kg/H)	SUS304 material, hard mechanical seal, outlet/inlet adapt SMS standard	550*380*960	3
SFHE-20	20	1300 (Kg/H)		760*400*1015	5.5
